Subject: RE: Bridge Tacoma - South Tacoma Field

---

I had a great discussion with Evan on Thursday. I think he has all he needs and said to email me if there are other items that come up. Sounds like he believes a permit is necessary for the water post-construction (but don't quote me, it is Monday and this is outside my area of expertise!).

Piper – As you know, Bridge is working with Ecology on the final SEPA permitting for the site. They seem to be having a hard time wrapping their heads around the prior EPA closure of the soil and we've been attempting to answer their questions. We recommended that they (Evan Wood) reach out to you directly if they had additional questions. I'm wondering if Evan did that and if so, do you have a sense of whether he has what he needs?

If its just easier to discuss this tomorrow we can set a couple of minutes aside.

Thom
